

## Steve R. Williams

Steven R. Williams, has over 13 years of experience in planning, designing, and implementing networking technologies and business operations/management. His experience has covered the spectrum of Fortune 1000 companies to include public corporations, technology manufacturing, and integration resellers. This diversity provides a wide range of experiences and environments to design, troubleshoot and manage customer solutions effectively.

After graduating from Eckerd College (St. Petersburg, FL) in 1992 with a BA in Management Information Systems and a minor in Computer Science, Steve went on to manage the Network Engineering department for Ceridian (formerly Applied Benefits Research). In 1995 Steve joined Cubix Corporation as a senior engineer.

Steve joined CompUSA in 1996 with the vision of spearheading a service team founded on enhancing customers' businesses with technology solutions. This goal was realized while consistently exceeding company expectations and achieving accreditation with Microsoft, Novell, 3Com, Cisco and others. During his last fiscal year with CompUSA, Steve's integration team exceeded \$2 million in revenue.

After leaving CompUSA, Steve joined a small Internet application/web development company as lead for their new Integration Services division. After one year, Steve had created a business model with service products and contracts that served as a foundation for further development.

In 1999, Steve decided to realize a long-term goal of developing a technology consulting company. The company's philosophy acknowledges fundamental changes in the technology industry.
